**Homelessness and Meth Abuse Discussion**

Sharon Meieran began the discussion and gave an overview. (Much of the discussion was based on the Atlantic article by Sam Quinones

<https://www.theatlantic.com/magazine/archive/2021/11/the-new-meth/620174/> and the OPB Think Out Loud interview with Sam Quinones <https://www.opb.org/article/2021/11/01/the-formulation-of-meth-has-changed-it-may-be-contributing-to-this-countrys-mental-health-crisis/>).

As an emergency room physician and volunteer with Portland Street Medicine, Sharon has worked with many who are experiencing homelessness and meth abuse. A significant portion of homelessness is driven by substance abuse, particularly meth. The meth now available is different from the meth available 10-20 years ago. It is also easier to make and is very cheap. Unlike opiates, there is no drug treatment (methadone for example) available.

What resources can be used towards drug treatment in this population? To Sharon's knowledge she doesn't know of any but has a meeting tomorrow and plans on asking this question.

There was a discussion about solutions other cities are pursuing. Built for Zero from Rockford, IL was outlined by Rick. In short, every houseless person identified and known by name. Teams of people help each person through their issue/problems. Sharon commented that she and Community Solutions have been advocating that the county pursue this option. HAT is, in a way, doing this. Sharon said that relationships can be built at a very small level to help a lot. We Shine (<https://weshinepdx.org/>) is a group working on
